## Night Vision Goggles

### ABOUT

The PVS-7 is the current military issue night vision goggle used by the US armed forces and is the preferred choice of many foreign allies and law enforcement professionals. Built to withstand the rigors of the battlefield, it delivers exceptional gain and resolution on the darkest of nights. The PVS-7 is offered with the highest quality Generation 3 image intensifier tube and features single tube, bi-ocular design, Mil Spec optics and housing, user friendly controls, built-in IR illuminator, and internal low battery and IR indicators.

The PVS-7 is equipped with Automatic Brightness Control (ABC), which automatically adjusts the brightness level of the image tube for varying light conditions. Lightweight and versatile, the goggles can be hand-held, head-mounted, and helmet-mounted. Afocal attachment lenses are available for longer range observation and surveillance.

Export of this product is strictly prohibited without a valid export license issued by the U.S. Department of State as prescribed in the International Traffic in Arms Regulation (ITAR), Title 22, Code of Federal Regulation, Parts 120-130
