

LRS

Long Range Surveillance Monocular

ABOUT

The LRS is a state of the art Generation 3 advanced night vision system designed for night time observations, photography, and video recording. The LRS offers superior performance and image clarity while being easily adaptable with Interchangeable Lens Nikon and Canon SLR Cameras (professional and consumer grade).

The LRS is designed and built to ensure superb photographic image quality straight from the box. All necessary adjustments to the LRS and matching LRS Photo and Video Adapters are done in the laboratory prior to shipment in order to ensure image quality and ease of use. The LRS provides bright image and high resolution across the entire frame with minimal light roll-off and distortion.

The unit is equipped with an invisible to the human eye short range IR illuminator. LRS is made out of aircraft grade 6061-T6 aluminum and is hard coated to the most stringent Mil-Spec requirements (Type 3, Black).

Export of this product is strictly prohibited without a valid export license issued by the U.S. Department of State as prescribed in the International Traffic in Arms Regulation (ITAR), Title 22, Code of Federal Regulation, Parts 120-130
