

DNVB

Dedicated Night Vision Binocular

ABOUT

The DNVB (Dedicated Night Vision Binocular) is a true binocular configuration with dual image intensifier tubes and molded housing components. DNVB has been designed specifically for situations where depth perception and observation capabilities are critical for mission and operational success. DNVB can be deployed as a hand-held binocular, head mounted, or helmet mounted binocular.

Ideal for surveillance and observation purposes, the DNVB can be outfitted with optional accessories such as 3X and 5X Afocal Magnifier Lenses for even greater range and functionality. The unit is fully submersible to a depth of 6.5 ft (2 meters) and is equipped with an invisible to the human eye short range infrared illuminator.

Export of this product is strictly prohibited without a valid export license issued by the U.S. Department of State as prescribed in the International Traffic in Arms Regulation (ITAR), Title 22, Code of Federal Regulation, Parts 120-130
