

G15

Night Vision Binocular

ABOUT

The G15 is a dual-tube night vision binocular developed specifically for situations where mission performance and depth perception are critical factors. The unit utilizes two image intensifier tubes, offering better depth perception and image clarity than single tube systems thereby greatly improving the user's ability to perform mission critical tasks. The G15 can be hand-held, head-mounted, or helmet-mounted. The unit is fully submersible to a depth of 6.5 ft (2 meters) and is equipped with an invisible to the human eye short range infrared illuminator.

The G15 is built from two GT-14 night vision monoculars which can be separated from each other, providing the user with greater flexibility to adapt to tactical situations. Each monocular can be independently hand held, head, helmet or weapon mounted and attached to a video camera.

G15 Night Vision Binocular

KEY FEATURES

- Improved depth perception
- Hand held or mounted on head or helmet
- Automatic brightness control (ABC)
- Submersible and shockproof

SYSTEM SPECIFICATIONS

Image Intensifier	U.S. Generation 3, Green (P43) or White (P45)
Magnification	1x
Range Focus	25 cm to infinity
Diopter Focus	-6 to +2
Field of View	40°
Operating Temperature	-51° C to +49°C
Storage Temperature	-51° C to +85°C
Weight	748 g/ 26 oz
Size	4.7L x 4.3W x 2.5H (inches) 12L x 11W x 6H (centimeters)
Battery	2 CR123 or 2 AA

OPTIONAL ACCESSORIES

3x Magnifier Lens

5x Magnifier Lens

Helmet Mount

Magnetic Compass

Purge Kit

Hard Case
