

PVS-14

Night Vision Monocular

ABOUT

The PVS-14 is a multi-purpose night vision monocular currently used by U.S. military and its allies worldwide. The PVS-14 features the most advanced Generation 3 image intensifier tube with a variable gain control to achieve the highest quality image resolution for various light conditions.

The unit can be hand-held as a monocular, head-mounted or helmet-mounted as a single-eye device, or weapon-mounted as a night scope.

Optional N-Vision Optics accessories such as dual mounts, weapon mounts, and magnifier lenses make the PVS-14 extremely versatile.
